

## HOMEMADE BORAX-FREE LAUNDRY DETERGENT

*from [backtoherroots.com](http://backtoherroots.com)*

**MAKES ONE GALLON (ABOUT 40 LOADS)**

### MATERIALS

2 cups very hot water  
1 cup baking soda  
1/3 cup salt  
1 cup unscented liquid castile soap  
Gallon-sized jug  
Water  
Printable label PDF  
Label sheet, printer and scissors

### DIRECTIONS

In a large, spouted measuring cup, stir together the hot water and baking soda until the soda is dissolved. Then add the salt and stir until it is dissolved. Add in the liquid castile soap and stir gently to combine.

Pour the mixture into the one-gallon jug (I use an old vinegar container, but a cleaned out bleach container will work, too). And then, slowly fill the gallon jug to the top with water. The soap will foam, but just keep filling until you have mostly liquid. Print out the labels, cut them out and place them on the container.

To use, shake the container to mix ingredients, then pour 1/3-1/2 cup of the solution into the washer while it fills. This recipe has NOT been tested with a high-efficiency washer, however, because it is low on soap, it does not create a lot of suds, so it might just work!
